Section 4:

4.1 Symptoms/Effects:

Acute:	Eye contact may cause eye irritation. Repeated or prolonged skin contact may cause skin irritation. Ingestion may irritate the gastrointestinal tract.
Chronic:	No known chronic effects.
4.2 Eyes:	Immediately flush with large quantities of water for 15 minutes. Hold eyelids apart during irrigation to ensure thorough flushing of the entire area of the eye and lids. Obtain medical attention if irritation occurs.
4.3 Skin:	Immediately flush with large quantities of water. Remove contaminated clothing under a safety shower. Continue rinsing. Obtain medical attention if irritation occurs.
4.4 Ingestion:	If victim is conscious, give 2 to 4 glasses of water and induce vomiting by touching finger to back of throat. Obtain medical attention.
4.5 Inhalation:	Remove victim from contaminated atmosphere. If breathing is labored, administer oxygen. If breathing has ceased, clear airway and start CPR. Obtain medical attention.

Section 5: FIRE FIGHTING MEASURES

5.1 Flammable Properties:		Not flammable				
	NFPA:	Health - 1	Flamm	nability - 0	Reactivity - 0	
5.2	5.2 Extinguishing Media:					
	5.2.1 Suitable Extinguishing Media:		Not flammable fire.	, use media suitable for combustibles involved in		
	5.2.2 Unsuitable	Extinguishing M	edia:	Not applicable		

5.3 Protection of Firefighters:

5.3.1 Specific Hazards Arising from the Chemical:

Physical Hazards:	Heating (flames) of closed or sealed containers may cause violent rupture of container due to thermal expansion of compressed gases.
Chemical Hazards:	Heating to dryness may cause the release of sulfur and oxides of sulfur and magnesium sulfate.

5.3.2 Protective Equipment and Precautions for Firefighters:

Firefighters should wear self-contained breathing apparatus (SCBA) and full fire-fighting turnout gear. Keep containers/storage vessels in fire area cooled with water spray.

Section 6: ACCIDENTAL RELEASE MEASURES

6.1	Personal Precautions:	Use personal protective equipment specified in Section 8. Isolate the release area and deny entry to unnecessary, unprotected and untrained personnel.
6.2	Environmental Precautions:	Keep out of "waters of the United States" because of potential aquatic toxicity. MagThio [®] is a non-hazardous liquid fertilizer solution designed to supply magnesium and sulfur to various crops.
6.3	Methods of Containment:	
	Small Release:	Confine and absorb small releases with sand, earth or other inert absorbents.
	Large Release:	Shut off release if safe to do so. Dike spill area with earth, sand or other inert absorbents to prevent runoff into surface waterways (potential aquatic toxicity), storm drains or sewers.
6.4	Method for Cleanup:	
	Small Release:	Shovel up absorbed material and place in drums for disposal as a chemical waste or recycle as a fertilizer as the original product was intended.
	Large Release:	Recover as much of the spilled product as possible using portable pump and hoses. Use as originally intended or dispose of as a chemical waste. Treat remaining material as a small release (above).

Section 7: HANDLING and STORAGE

- **7.1 Handling:** Avoid contact with eyes. Use only in a well-ventilated area. Wash thoroughly after handling. Avoid prolonged or repeated breathing of vapors. Avoid prolonged or repeated contact with the skin.
- **7.2 Storage:** Store in well-ventilated areas. Do not store combustibles in the area of storage vessels. Keep away from any sources of heat or flame. Store totes and smaller containers out of direct sunlight at moderate temperatures. (See Section 10.5 for materials of construction.)

Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Exposure Guidelines:

Chemical	OSHA PELs		ACGIH TLVs	
	TWA	STEL/C	TLV	STEL
Not applicable				

8.2 Engineering Controls: Use adequate exhaust ventilation to prevent inhalation of product vapors. Keep eye wash/safety showers in areas where product is commonly handled.

8.3 Personal Protective Equipment (PPE):

8.3.1 Eye/Face Protection: Chemical goggles and a full face shield.
8.3.2 Skin Protection: Neoprene rubber gloves and apron should be worn to prevent repeated or prolonged contact with the liquid. Wash contaminated clothing prior to reuse.
8.3.3 Respiratory Protection: None generally required. If conditions exist where mist may be generated, a NIOSH/MSHA approved mist respirator should be worn.
8.3.4 Hygiene Considerations: There are no known hazards associated with this product when used as recommended, however common good industrial hygiene practices should be followed, such as washing thoroughly after handling and before eating or drinking.

Section 10: STABILITY and REACTIVITY

10.1 Reactivity:	Avoid interaction with heat (flames), oxidizers, acids or alkalis (See details below in this section).
10.2 Chemical Stability:	MagThio [®] is a stable material under normal (ambient) temperature and pressure.
10.3 Possibility of Hazardous Reactions:	Strong oxidizers such as nitrates, or chlorates can cause explosive mixtures if heated to dryness.
10.4 Conditions to Avoid:	High temperatures, fire conditions.
10.5 Incompatible:	Strong oxidizers (See section 10.3). Acids will cause the release of sulfur dioxide, a severe respiratory irritant. Magnesium thiosulfate is not compatible with copper, zinc or their alloys including brass, bronze or galvanized materials. These materials should not be utilized in handling systems or storage containers for this product.
10.6 Hazardous Decomposition Products:	Heating this product will evolve sulfur dioxide. Heating to dryness will cause the production of magnesium sulfate, sulfur and oxides of sulfur. Sulfur dioxide is a severe respiratory irritant.
